

Indianapolis, Indiana

Indiana University School of Medicine Research Institute II

975 W. Walnut St.
Indianapolis, IN 46227

ADJUSTABLE FORMS
Concrete Construction Since 1930

Client

Indiana University

General Contractor

F.A. Wilhelm

Architect

BSA LifeStructures

Area

128,215 square feet

Completion

2003

This all new facility will serve a variety of uses for the Indiana University School of Medicine. Within its 5 stories are 60 fully-equipped medical research labs, imaging suites, teaching classrooms, and office spaces. In addition to the main building, the project included the construction of a tunnel below neighboring Walnut Street that connects the medical library with the research buildings.
