

Chicago, Illinois

River Place On The Park

680 N. Larabee St.
Chicago, IL 60610

Adjustable Forms constructed this 21 story condominium located in the near north side along the Chicago River. The mild steel reinforced concrete frame was constructed on a 5 day cycle.

Particularly challenging to this project were the exterior columns, which were gang formed using EFCO Plate Girders. The central core was formed using EFCO's Power Tower. Concrete placing was accomplished using Schwing 8800 Trailer Pump with a Self-Rising Core mounted 32

meter placing boom. The building features a public walkway along the Chicago River, as well as access to a neighboring dog park.
